RAMTEK
Mission Critical Solutions

STULZ
CLIMATE. CUSTOMIZED.

Backed by over 40 years of experience, STULZ is the foremost pioneer in the field of air conditioning solutions for dependable applications in Mission Critical Environments. STULZ precision air conditioning equipment is developed and manufactured in the USA, to the very highest standards of quality, and in line with exceptionally stringent testing criteria.

- Ceiling, Perimeter, In-Row, and Outdoor Packaged Computer Room Air Conditioners (CRAC) and Air Handlers (CRAH)
- Desiccant dehumidifiers for industrial, agriculture, and remediation
- Indoor agriculture precision cooling and humidity control solutions
- Ultrasonic humidification and RODI solutions

Munters
Data Center Solutions

Munters is a global leader in energy efficient and sustainable air conditioning designs in addition to manufacturing cooling solutions for data centers. Using the latest technology, Munters offers energy efficient sustainable products built to the highest quality and standards. Data centers around the globe are benefiting from low PUE's by using Munters' technology.

- Indirect Evaporative Systems, (wet, dry and hybrid)
- Custom Solutions to meet exact specifications
- SyCool Split – Indirect Thermosyphon Cooling
- Evaporative Adiabatic Humidifiers

Air$_2$O
Intelligent cooling

Air2O are world leaders and pioneers in advanced evaporative cooling and Hybrid Air Conditioning Technologies particularly suited to cooling large scale facilities, Data Centers and Agriculture Facilities. Together with their custom build ability and sustainable approach implementing the latest technology, Air2O can deliver up to 70% energy savings against conventional cooling technologies.

- Custom Indirect Evaporative Cooling Systems (wet, dry and hybrid)
- Dedicated Outdoor Air Systems (DOAS) & Energy Recovery
- Custom Chilled Water and DX Systems
- Custom Agriculture Dehumidification & Cooling Units

COSMOTEC
A BRAND OF STULZ
INDUSTRIAL COOLING

Since 1989 Cosmotec has been among the leading producers of enclosure cooling systems and liquid chillers around the world. Technology, innovation, quaility and flexibiltiy define who Cosmotec is at its core. Cosmostec offers a complete line of UL listed products available in United States market.

- Indoor/Outdoor AC - Process cooling and industrial applications
- Filter fans - wide range of sizes and power supply options
- Patented Counterflow Aluminum Core Heat Exchangers
- Chillers - Industrial, IT and comfort applications

RAMTEK
Mission Critical Solutions

Coolcentric
MAKING DATA CENTERS SUSTAINABLE

Coolcentric delivers the world's most energy and space efficient cooling solutions for reducing data center costs. Coolcentric's products for rack level cooling, combined with services for integration, deployment, and sustainability of data center thermal solutions, allow customers to optimize their data centers for maximum performance and return on investment.

- "Passive" or "Active" heat removal supports up to 40 kW per rack
- Covers full spectrum of low-to-high density applications
- Close-coupled, water-based cooling
- Adaptable to existing equipment racks, vendor agnostic

OptiCool
TECHNOLOGIES

OptiCool Technologies is a leading provider of innovative data center cooling solutions. Opticool specializes in refrigerant-based, close-coupled cooling solutions designed to support a wide variety of data center applications, from low-to-high density.

- "Active" heat extraction supports up to 60 kW per rack
- Close-coupled, pumped refrigerant based heat extraction
- Adaptable to existing equipment racks, vendor agnostic
- No containment or airflow management required

SANUVOX

Sanuvox Technologies Inc. is a global leader in ultraviolet air purification providing the most advanced, cost-effective in-duct and stand alone UV air and coil sterilization systems available. Proprietary Sanuvox UV systems are designed to maximize exposure time, delivering the UV energy required for exceptionally high airborne disinfection rates.

- Improve indoor air quality and energy efficiency
- Sterilizes airborne bio-contaminants including **Coronaviruses** in a single pass
- Prevents powdery mildew, Botrytis, Penicillium and other fungus that pose a threat to indoor agriculture growers

PermAlert™
Division of Perma-Pipe, Inc.
Liquid Leak Detection & Location Systems

PermAlert is the industry leader in leak detection technology and provides the most innovative products serving multiple sectors. PermAlert offers the most effective, reliable, and continuous monitoring solutions.

- Multilevel and multi-location detection
- Water, acids, bases, solvents, hydrocarbon liquid detection
- Detects multiple leaks on a single cable
- Cable insusceptible to contamination from dirt or dust
