

AGronomic IQ sets the HVAC standard for commercial growers by taking advantage of an all-in-one system to deliver the most precise temperature and humidity control in the industry, with exceptional energy efficiency. Our systems dynamically deliver dehumidification, cooling, or heating depending on room requirements, providing a cost-effective, scalable solution with exceptional redundancy & reliability.

- Unitary System Design with Dehumidification Priority
- Revolutionary Compressor Wall Technology (CWT)

- GrowSentry: 24/7 Live Monitoring & Remote Control
- Precise Modulating Performance Control

Intelligent cooling

Air2O are world leaders and pioneers in advanced evaporative cooling and Hybrid Air Conditioning Technologies particularly suited to cooling large scale facilities, Data Centers and Agriculture Facilities. Together with their custom build ability and sustainable approach implementing the latest technology, Air2O can deliver up to 70% energy savings against conventional cooling technologies.

- Custom Agriculture Dehumidification & Cooling Units
- Multiple Heat Recovery Technologies (Enthalpy Wheel, Heat Pipe, etc.)

- Chilled Water and DX Air/Water Cooled Systems
- Integrated Controls with BMS/Internet Connectivity

Sanuvox proprietary custom real time sizing and performance utilizes CFM, duct dimensions, and cubic feet per space being treated. Performance objective is to disinfect the air of Powdery Mildew and Botrytis within the space at a rate of 95% or higher every hour the unit is operating. This disinfection rate is based on 8-12 air changes per hour.

- Eliminates up to 99.9% of airborne powdery mildew every hour
- Reduces fungicide use by up to 90%

- Helps enrich terpenes & enhances aromas
- Improves microbiological state testing compliance

Kelvion is one of the leading global manufacturers of heat exchangers and has been providing solutions for almost every industrial application imaginable since the 1920s, specializing in customized solutions suitable for extreme environmental and service conditions, as of 2015 under the name of Kelvion.

Experts in heat exchange since 1920

- Open and Closed Loop Cooling Towers
- Plate, Gasketed and Welded Heat Exchangers

- Dry Coolers and Adiabatic Spray/Evaporative Pad Dry Coolers

GENERAC

Generac, US market share leader in residential engine generators, also manufactures performance leading Industrial Engine Generators for the commercial marketplace. Available up to 2000kW with both Natural Gas and Diesel Fuel sources, Generac can provide both Modular Parallel and single engine solutions to meet almost any need.

- Designed to meet today's strict environmental requirements.
- Emission friendly to EPA standards.
- Generac Standby generators protect your bottom line.
- Protects businesses from the damage of power outages.

STARLINE

Established nearly 90 years ago, Star-line, has grown to become a global leader in flexible Track Power Distribution equipment used in critical environments such as Data Centers and Research Labs. Enhanced by its metering and monitoring features, Starline can provide complete and flexible power distribution solutions in industrial applications as well.

- Starline Track Busway combines the Flexibility of track lighting with the versatility of higher ampacity power distribution
- Plug-In Raceway can be customized variety of receptacle and breaker configurations

TRYSTAR

Trystar Generator Docking Stations are designed to safely connect and disconnect a portable generator to a building, lift station, or portable piece of equipment. During a power outage, a generator docking station allows you to quickly return power without an electrician, which helps protect your building from the risks and costs of power loss.

- All aluminum construction or all stainless steel construction.
- Protective caps on all panel mounts to prevent accidental contact
- Trystar rake theft reduction system.
- UL 50 Listed, ETL/C-ETL 1008 Listed, NEMA 3R or NEMA 4X.

SPHINX
GROW HOUSE AIR FILTRATION

SPHINX was designed for licensed producers (cultivators) to address the unique air quality needs of grow market. Our custom grow market filtration helps remove heavy odors, control powdery mildew and mold, and protect crop yield.

- Removes 99.9% of mold and powdery mildew
- Customized odor blend for grow house operations
- With interchangeable filtration media, you get more targeted contaminant removal
