

Backed by over 40 years of experience, STULZ is the foremost pioneer in the field of air conditioning solutions for dependable applications in Mission Critical Environments. STULZ precision air conditioning equipment is developed and manufactured in the USA, to the very highest standards of quality, and in line with exceptionally stringent testing criteria.

- Ceiling, Perimeter, In-Row, and Outdoor Packaged Computer Room Air Conditioners (CRAC) and Air Handlers (CRAH)
- Title 24 Compliant Equipment

- Desiccant dehumidifiers for industrial, agriculture, and remediation
- Ultrasonic Humidification Systems

**Munters**  
Data Center Solutions

Munters is a global leader in energy efficient and sustainable air conditioning designs in addition to manufacturing cooling solutions for data centers. Using the latest technology, Munters offers energy efficient sustainable products built to the highest quality and standards. Data centers around the globe are benefiting from low PUE's by using Munters' technology.

- Indirect Evaporative Systems, (wet, dry and hybrid)
- Custom Solutions to meet exact specifications

- SyCool Split – Indirect Thermosyphon Cooling
- Evaporative Adiabatic Humidifiers

**COSMOTEC**  
INDUSTRIAL COOLING

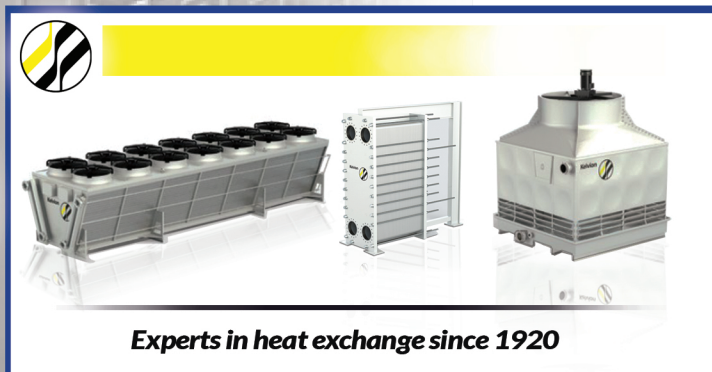

### Industrial Thermal Management

Air Conditioners - Chillers - Heat Exchangers - Ventilation

Cosmotec manufactures thermal management solutions. Designed for diverse applications, including electronics, telecommunications, and medical devices, their products stand out for their efficiency and longevity. Cosmotec is dedicated to advancing technology sustainably, making our products the preferred choice for businesses seeking innovative and environmentally conscious thermal solutions.

- Indoor/Outdoor AC - Process cooling and industrial applications
- Filter Fans - Wide range of sizes and power supply options

- Patented counterflow aluminum core heat exchangers
- Chillers - Industrial, IT and comfort applications

Experts in heat exchange since 1920

Kelvion is one of the leading global manufacturers of heat exchangers and has been providing solutions for almost every industrial application imaginable since the 1920s, specializing in customized solutions suitable for extreme environmental and service conditions, as of 2015 under the name of Kelvion.

- Open and Closed Loop Cooling Towers
- Plate, Gasketed and Welded Heat Exchangers

- Dry Coolers and Adiabatic Spray/Evaporative Pad Dry Coolers

Coolcentric delivers the world's most energy and space efficient cooling solutions for reducing data center costs. Coolcentric's products for rack level cooling, combined with services for integration, deployment, and sustainability of data center thermal solutions, allow customers to optimize their data centers for maximum performance and return on investment.

- "Passive" or "Active" heat removal supports up to 40 kW per rack
- Covers full spectrum of low-to-high density applications

- Close-coupled, water-based cooling
- Adaptable to existing equipment racks, vendor agnostic

OptiCool Technologies leads in data center cooling with its innovative Opticool products. Their solutions focus on refrigerant-based, close-coupled cooling, catering to diverse data center needs from low to high density. Opticool's cutting-edge technology ensures efficient cooling, enhancing data center performance and reliability. By providing targeted cooling solutions, Opticool optimizes energy usage and minimizes environmental impact.

- "Active" heat extraction supports up to 60 kW per rack
- Close-coupled, pumped refrigerant based heat extraction

- Adaptable to existing equipment racks, vendor agnostic
- No containment or airflow management required

Sanuvox Technologies Inc. leads globally in ultraviolet air purification, offering cutting-edge, cost-effective in-duct and stand-alone UV air and coil sterilization systems. Their proprietary UV systems are meticulously designed to optimize exposure time, ensuring the delivery of the necessary UV energy for exceptionally high rates of airborne disinfection. Trusted by industries worldwide, Sanuvox sets the standard for advanced and reliable UV air purification solutions.

- Improve indoor air quality and energy efficiency
- Sterilizes airborne bio-contaminants including Coronaviruses in a single pass

- Prevents powdery mildew, Botrytis, Penicillium and other fungus that pose a threat to indoor agriculture growers

PermAlert stands out as the premier provider of leak detection technology across various sectors. Renowned for its innovative products, PermAlert delivers unparalleled effectiveness, reliability, and continuous monitoring solutions. With a commitment to excellence, PermAlert's cutting-edge technology ensures swift and accurate detection, safeguarding assets and operations against potential risks.

- Multilevel and multi-location detection
- Water, acids, bases, solvents, hydrocarbon liquid detection

- Detects multiple leaks on a single
- Cable unsusceptible to contamination from dirt or dust
