

Energy Solutions

Eaton xStorage

Eaton's xStorage Energy Storage Solutions optimize energy usage, reduce costs, and generate additional revenue from existing assets. Features include demand charge management, time-of-use optimization, and asset aggregation, enabling sustainable energy solutions while maintaining full control over energy and battery assets.

Yotta Energy

Yotta Energy specializes in cutting-edge modular energy storage solutions for commercial applications, emphasizing scalable and cost-effective lithium-ion battery systems. Their unique modular battery products and inverter technology are the easy button for compliance to California's new Title 24 energy requirements. Their technology aims to optimize renewable energy integration, providing reliable, expandable, and sustainable power solutions for businesses and industries.

Fortress Power

Fortress Power specializes in advanced energy storage solutions, offering the safest lithium iron phosphate batteries for residential, commercial, and industrial applications. Their products prioritize durability, efficiency, and reliability, providing seamless integration with renewable energy sources for sustainable power management. Fortress Powers unique integrated Micro-grid control provides seem-less integration to other energy sources such as solar, wind, and fuel cell solutions. Fortress Power engineers are experts in coordinating and interfacing energy assets onto one manageable platform.

Socomec

Socomec provides a diverse range of energy products, including energy storage solutions, renowned for reliability and innovation. In addition to storage solutions, their offerings include custom transformer products designed and manufactured to maximize energy efficiency across your electrical infrastructure emphasizing sustainable solutions, cutting-edge technology and resulting in the lowest total cost of operation for the user.

Generac

Generac, the leading industrial backup generator brand, offers versatile models running on natural gas, propane or diesel fuels, providing power to all or selected electrical systems. Generac generator solutions can be integrated into Micro-grid solutions as a distributed energy resource (DER) and interfaced with their Mobile Link app, to monitor your energy asset remotely. Features include outage detection, automatic activation, and seamless power restoration.
